Contact ATCOM

Overview of ATCOM

ATCOM is the leading VoIP hardware manufacturer in global market. We have been keeping innovating with customer's needs oriented , working with partners to establish a total solution for SMB VoIP with IP phone , IP PBX and Asterisk cards.

With over 10 years' experience of R&D , manufacturing and service in network and VoIP filed;mission of creating the biggest value for IP terminals , we commit ourselves in supplying the competitive IP phone and other terminals for IP PBX , softswitch , IMS , NGN providers and carriers; supplying the competitive total VoIP solution for SMB market. We keep improving the customer's experience and creating the bigger value with our reliable products. Until now, our VoIP products have been available in 100+ countries and used by millions of end users.

1. Overview of A2X(W)/A20LTE

A2X(W)/A20LTE

Type	POE	Power adapter	Wi-Fi	1000M	4G(LTE)/3G
A21	Yes	Optional accessory	No	No	No
A20W	No	Necessary	Yes	No	No
A26	Yes	Optional accessory	No	Yes	No
A20WAC	No	Necessary	Yes (2.4G+5G)	No	No
A20LTE	No	Necessary	NO	No	Yes

1.1. Interface

Power Input	DC 5V-1000mA or POE
LAN Port	RJ45
PC Port	RJ45
Headset Jack	RJ9
Handset Jack	RJ9
LTE Nano card Port	Nano-SIM card port(A20LTE)

1.2. Hardware

LCD	132*52
CPU	400MHz Dual-Core
LED Indicator	1 Status Light , 2 line indicators

1.3. LTE data parameters

LTE Frequency band		LTE FDD: B1/ B3/ B8
		LTE TDD: B38/ B39/ B40/ B41
		TDSCDMA: B34/ B39
		WCDMA :B1/ B8
LTE Version		3GPP E-UTRA Realease 11
Bandwidth		1.4 /3 /5 /10/20MHz
Antenna		DL MIMO, Support receive diversity
Data	LTE	LTE FDD: Max 1500Mbps (DL) Max 50Mbps (UL) LTE TDD: Max 130Mbps (DL) Max 35Mbps (UL)
	DC-HSPA+	Max 42Mbps (DL) Max 5.76Mbps (UL)
	UMTS	Max 384Mbps (DL) Max 384Mbps (UL)
	TD-SCDMA	Max 4.2Mbps (DL) Max 2.2Mbps (UL)
	CDMA	Max 3.1Mbps (DL) Max 1.8Mbps (UL)
	EDGE	Max 236.8Kbps (DL) Max 236.8Kbps (UL)
	GPRS	Max 85.6Kbps (DL) Max 85.6Kbps (UL)

1.4. Software

➢ Sip 2.0 (RFC3261) and other related SIP RFCs
➢ 6 SIP accounts registration
➢ STUN
➢ Jitter Buffer, VAD,CNG
➢ G711A, G711U, G722, G726-16, G726-24, G726-32, G726-40, G729, L16, iLBC_13_3, iLBC_15_2
➢ Echo Cancellation
➢ SIP Domain name, Authentication and Backup SIP Server
➢ DTMF（RFC2833, Inband, SIP INFO)
➢ Call transfer, Call forward, 5-way conference, Call hold, Call back
➢ DND(Do Not Disturb), Auto answer, Blacklists, Block Call-ID, Block Anonymous call, Dial plan, IP call
➢ Phone book with 1000 contacts and 50 blacklists
➢ Call History with 400 records include answered calls, missed calls, dialed calls and forward calls
➢ Auto update via HTTP, HTTPS, FTP, TFTP, DHCP, RPS and PNP

➢ Syslog
➢ SNTP, NTP
➢ Customized Ringtone
➢ Daylight Saving time
➢ VLAN, OpenVPN, Span to PC port, QoS
➢ 802.1X, LLDP
➢ Enterprise WIFI
➢ WEB access with different login level
➢ Soft button: soft button *3
➢ Redundancy SIP server
➢ Multi-language: English, French, Hebrew, Russian, Spanish, Simplified or Traditional Chinese, Persian, Polish, Portuguese, Turkish, German, Italian
➢ Support 2.4GHz and 5GHz WiFi
➢ Support 4G(LTE) & 3G

1.5. Network

➢ LAN/PC: Support Bridge mode
➢ Support VLAN
➢ SupportOpen VPN
➢ IPv6
➢ Support DHCP, STATIC IP
➢ Primary/SecondaryDNS Server
➢ Support QoS
➢ Support LLDP
➢ Support 802.1X
➢ Support Span pc port
➢ Support Enterprise WIFI
➢ Web access via HTTP&HTTPS
➢ A20W support 2.4GHz WiFi with 802.11n protocol
➢ A20WAC support 2.4GHz WiFi and 5GHz WiFi with 802.1AC protocol
➢ A20LTE support 4G(LTE) and 3G access

1.6. Management and Maintenance

➢ Support firmware updating under safe mode
➢ Support different level user management
➢ Configuration via web , keyboard
➢ Support multi-language
➢ Firmware and configuration file auto provision
➢ Support system log

1.7. Protocol

➢ IEEE 802.3 /802.3 u 10 Base T / 100Base TX
➢ DHCP: Dynamic Host Configuration Protocol
➢ SIP RFC3261, RFC3262, RFC3263, RFC3264, RFC3265, RFC2543, RFC3489, RFC3842, RFC3515, RFC2976, RFC3428, RFC2327, RFC2782, RFC1889
➢ TCP/IP: Transfer Control Protocol/Internet Protocol
➢ RTP: Real-time Transport Protocol
➢ RTCP:RTP Control Protocol
➢ DNS: Domain Name Server
➢ TFTP: Trivial File Transfer Protocol
➢ HTTP:Hypertext Transfer Protocol
➢ FTP:File Transfer Protocol

1.8. Compliant and Certified Standard

➢ CE: AGC01180140201E2，AGC01180140202E2
➢ Comply with ROHS in EU
➢ Comply with ROHS in China
➢
➢ Operation temperature: lower than 60° C
➢ Storage temperature: lower than 60° C
➢ Humidity: 10 to 90% no dew

1.9. Packing list

| Model	A2X(W)
Telephone	1 Unit
Handset	1 Unit
Handset cable	1 Unit
Stand bracket	1 Unit
Wall bracket	1 Unit
Power adapter	Optional for A21,A26 Standard for A20W, A20WAC,A20LTE

Network Cable	1 Unit，1.5 meters
Quickstart Guide	1 Unit
Headset	Optional

1.10. Connection

1.10.1. Connect wired network

A2X(W)/A20LTE is able to be connected with network via LAN port. Under the Bridge mode, other devices (Laptop, IP phone) is able to access network via the PC port of A2X(W).

The topology is as follows:
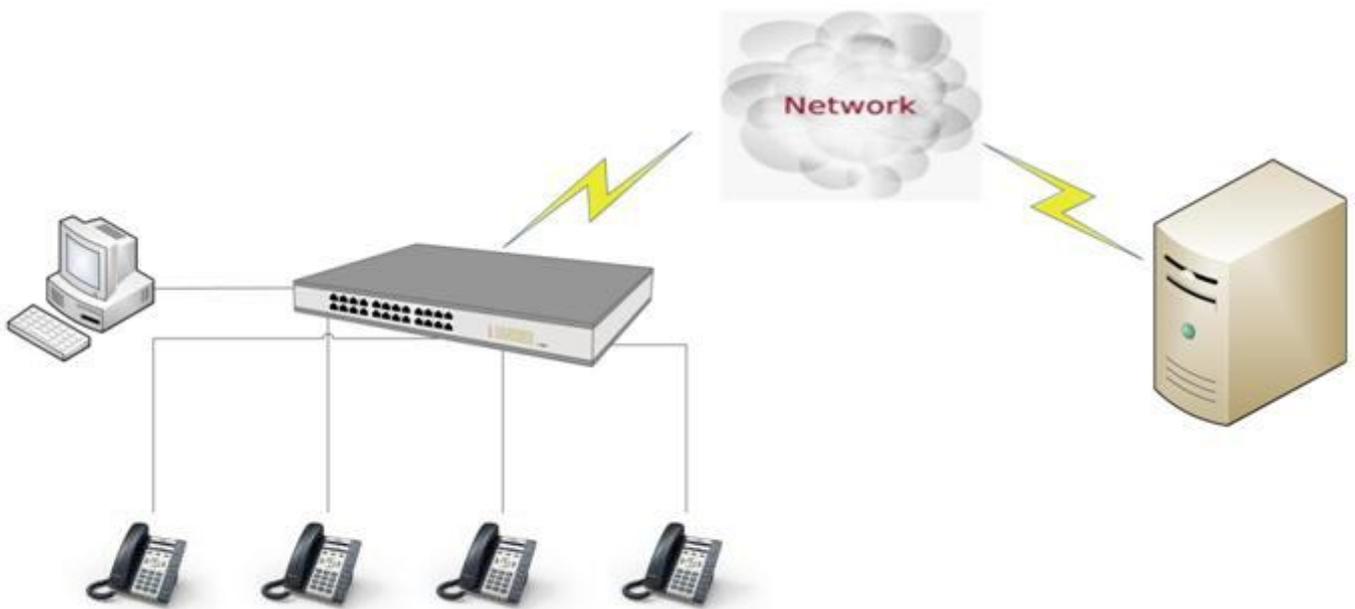

1.10.2. Connect WiFi network

A20W and A20WAC is able to connect the WiFi.

The topology is as follows:

1.10.3. Connect LTE network

If enable **LTE setting**, A20LTE get service network.

(Note: The A20LTE phone can communicate with other devices through the LTE data acquisition network. The acquired LTE data network is the public network of the carrier. At this time, the phone web interface cannot be accessed.)

The topology is as follows:
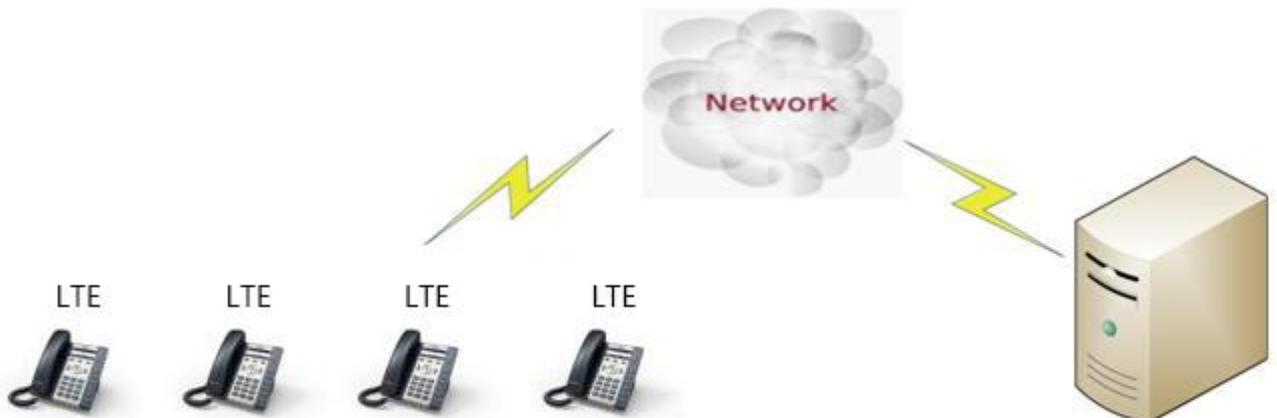

1. Press **Menu → LTE Setting**, enable LTE feature

2. After enable LTE, press ↓ key, you can see **Network service, Network type,**

   Signal strength and IMSI.

# 1.11. Installation

1.11.1. Connecting port introduction

The **A2X(W)** connecting port introduction, please refer as below picture:
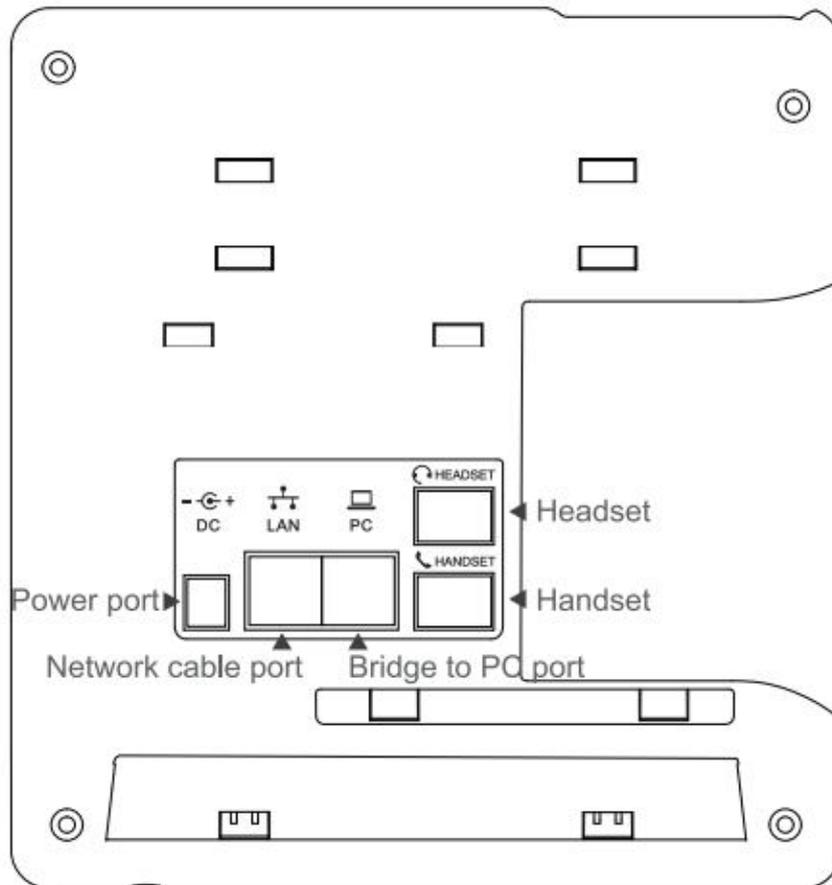

The **A20LTE** connecting port introduction,

From as below picture show the connecting port and insert the standard Nano-SIM card into the back cover way:

(Note: please don't plug in and off Nano card when the phone connected power)
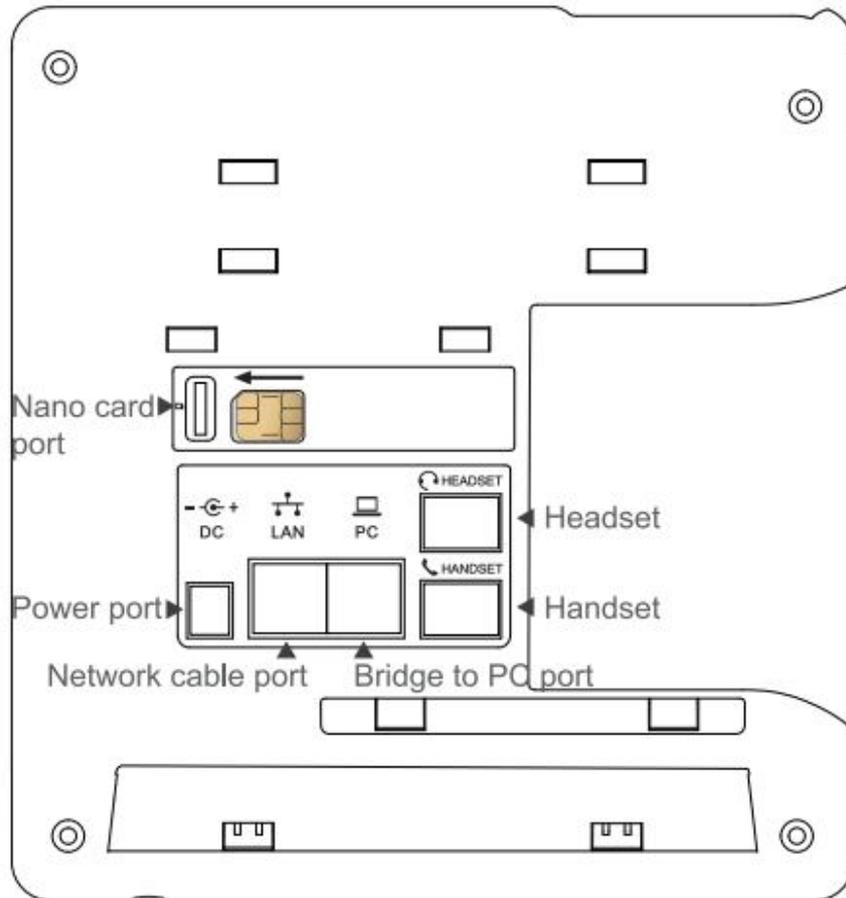

1.11.2. Installation instruction

1. Stand bracket installation instruction

A. Put the bottom side of the IP phone upside and press one-side joints of stand bracket into the slot, please refer the picture as below:
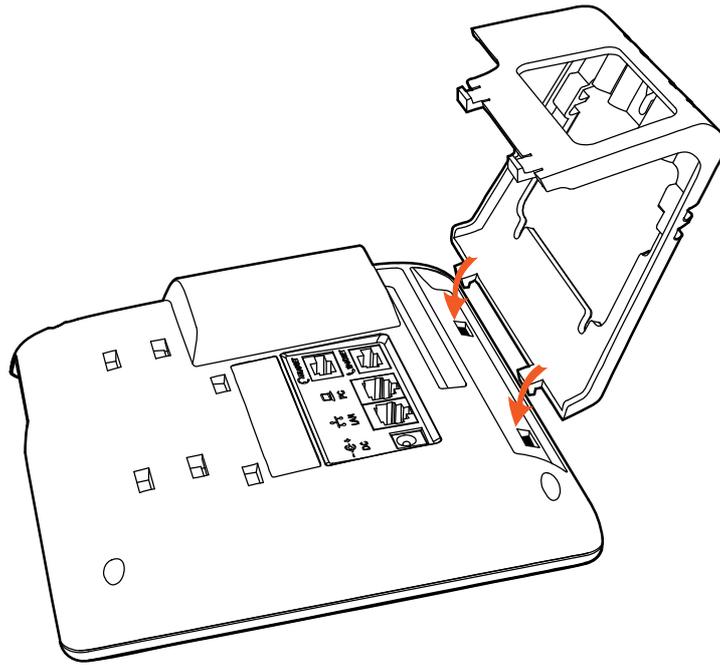

B. Press the other side joints into the slot according to the direction of the arrow:
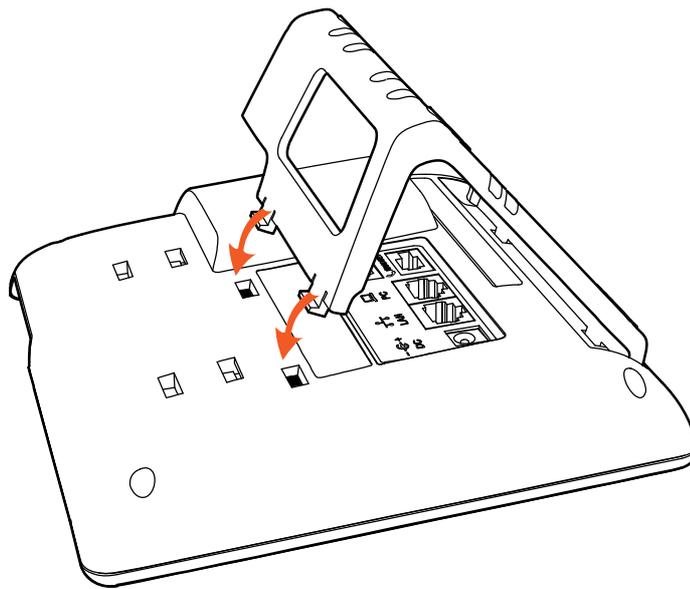

C. It is the right picture after fixing the stand bracket below:
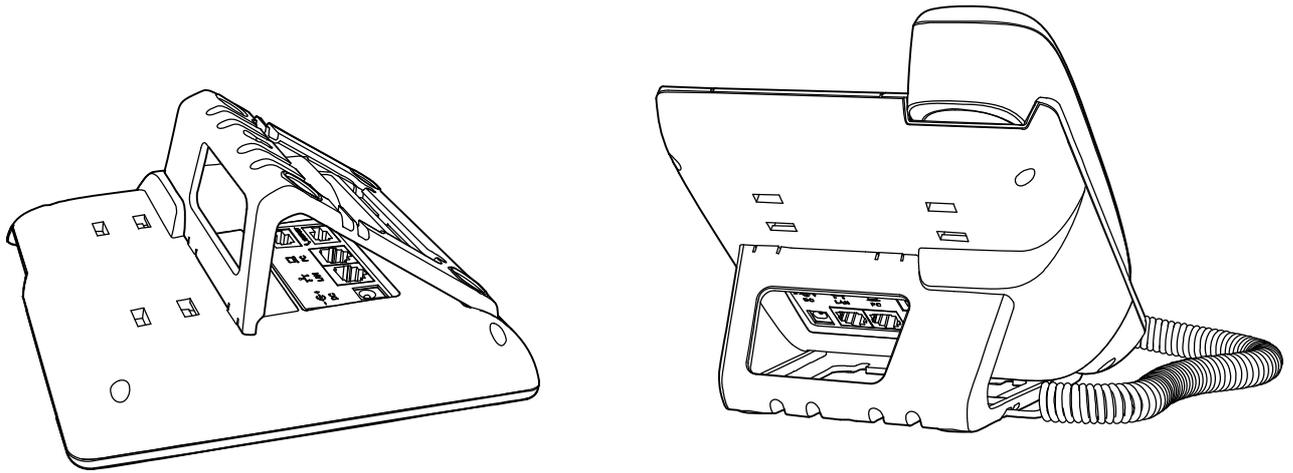

D. Disassemble the stand bracket:

Push the spring joint of stand and pull the stand according to the direction of the arrow. When the joints are pulled out of the slot, you can take off the stand bracket
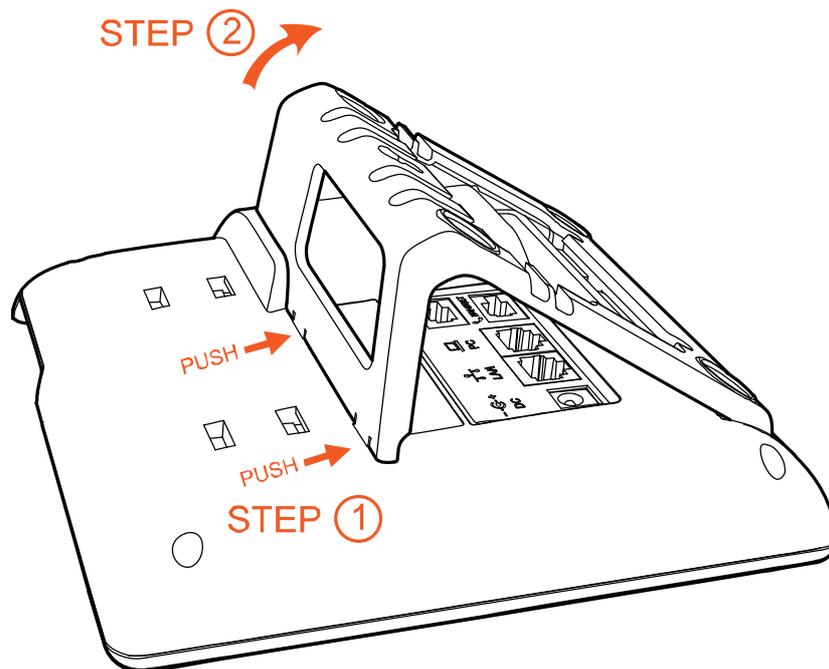

2. Wall-hung Installation

A. Put the bottom side of the IP phone upside and press one-sidejoints of wall-hung stand bracket into the slot, please refer the picture as below:
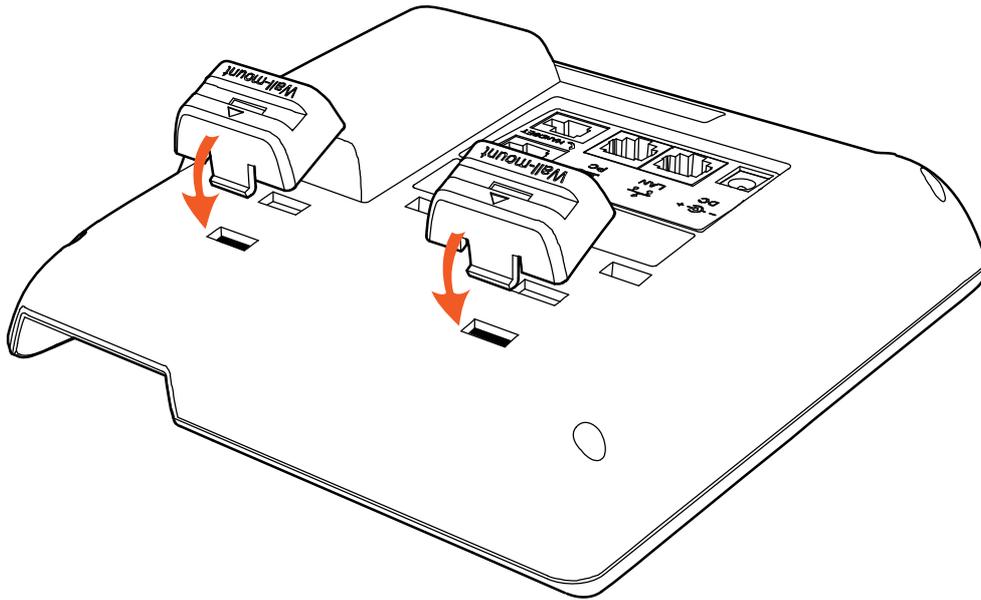

B. Press the other side joints into the slot according to the direction of the arrow
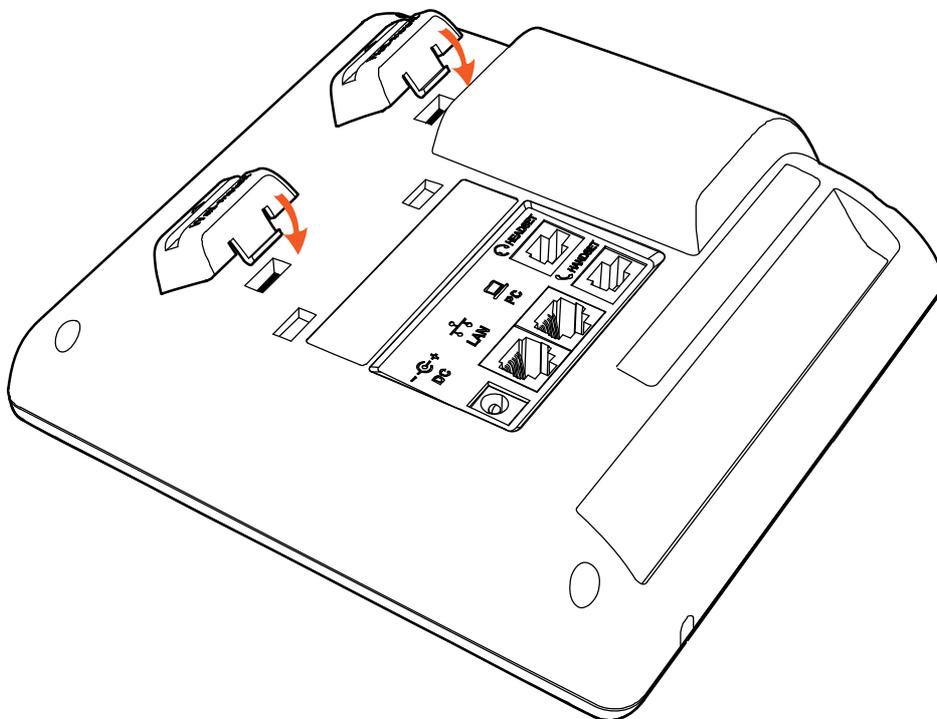

C. After install the wall-hung stand bracket, press one-sidejoints of stand bracket into the slot, please refer to the picture as below:
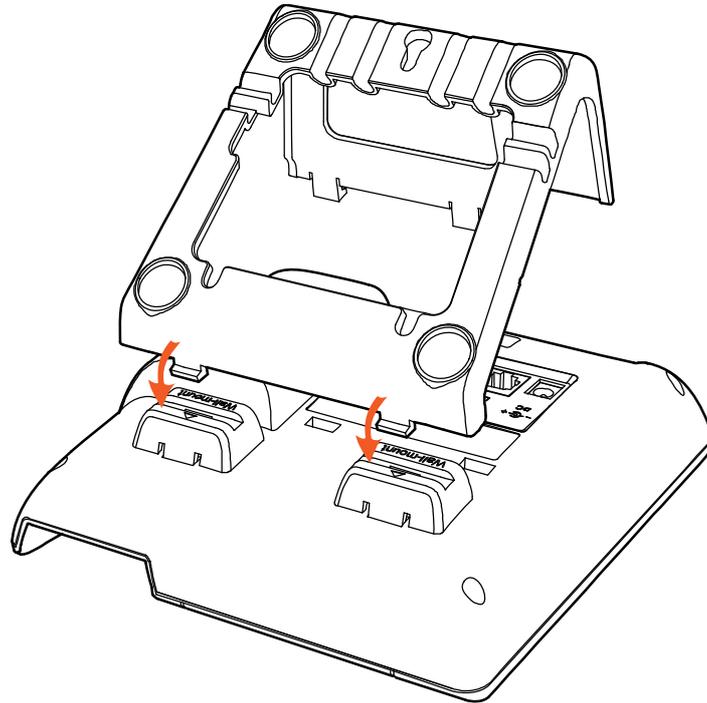

D. Press the other side joints into the slot according to the direction of the arrow
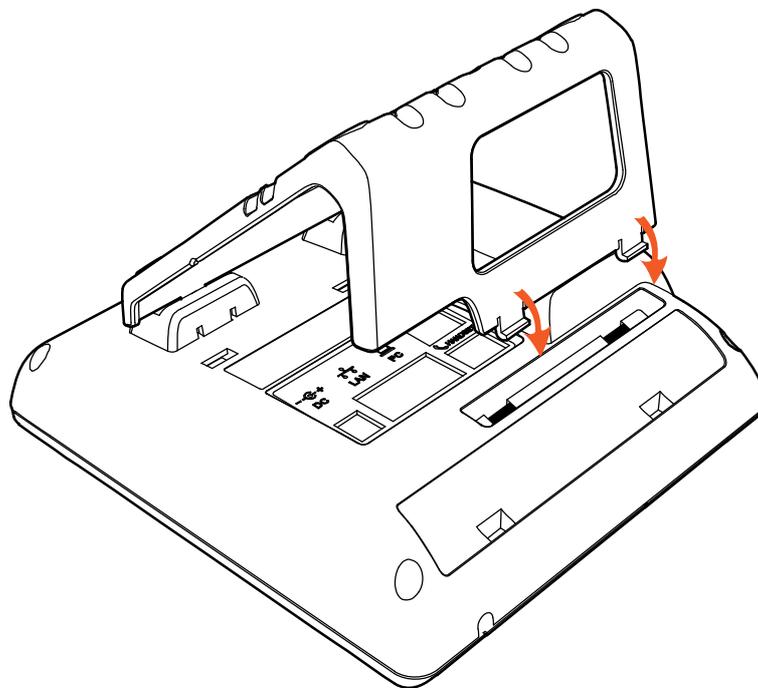

E. Knock in nails or screws on the wall according to the proportion of the distance between the hanging holes as below:

Hanging hole

Hanging hole
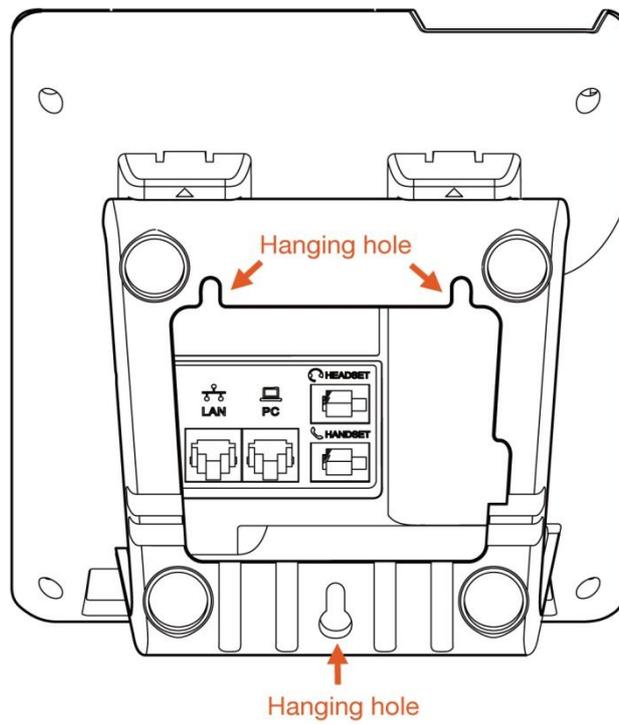

F. It is the right picture after fixing the stand bracket below:
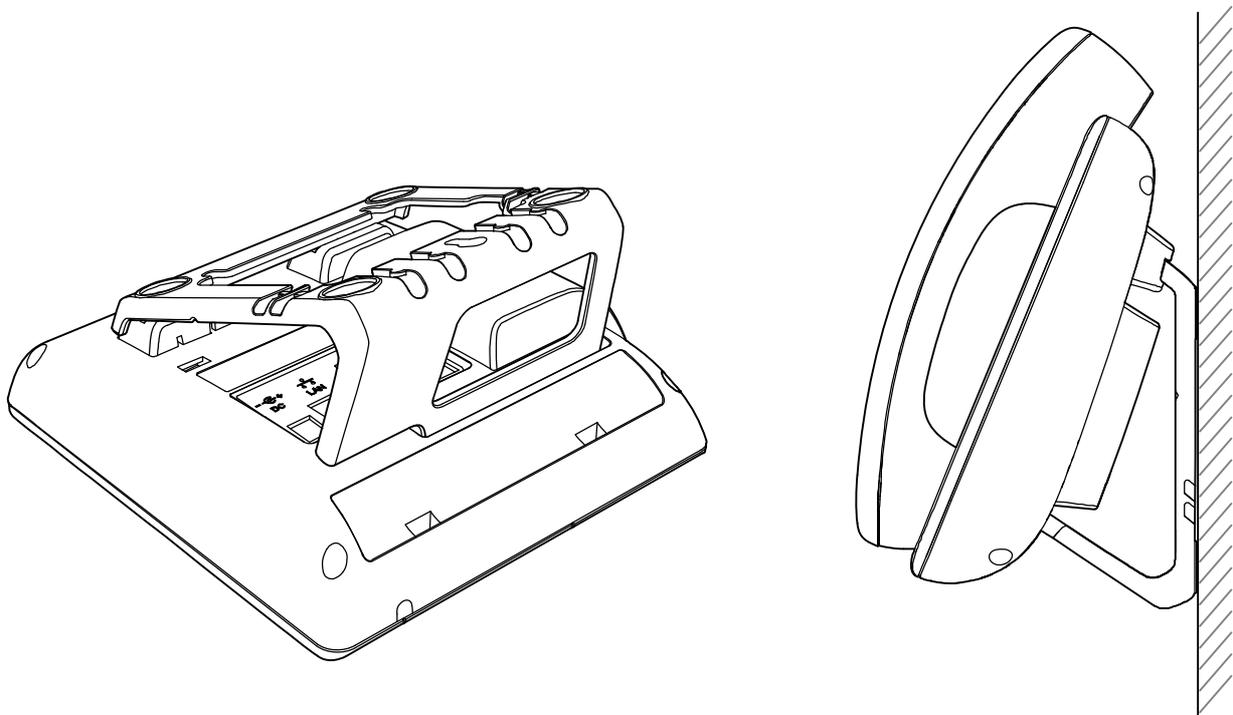

G. Disassemble the stand bracket:

Push the spring joint of stand and pull the stand according to the direction of the arrow. According to the direction of the arrow:
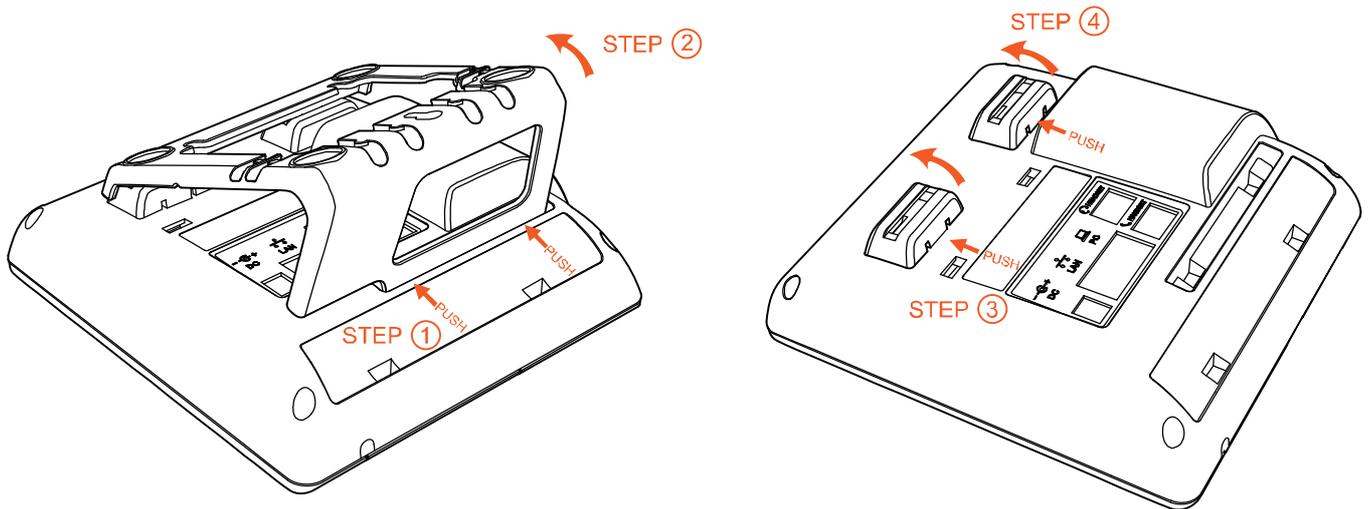

2. Call Function

2.1. Answer the calls

When there is an incoming call, phone will remind user with ringing. There are 3 ways to answer the call:

A. Answer by handset

Pick up the handset and talk with the caller. If you want to hang up, just put back the handset. When you are talking with the handset and want to switch to speaker or headset mode, please press (🔊) key or (🎧) key,and then put down the handset.

B. Answer by speaker

Press [speaker icon] key and talk with callers by built-in Micro-phone and Speaker. If you want to

hang up, please press [speaker icon] key again. Switch calling or talking into handset mode by

lifting the handset under speaker mode. Press [headset icon] key will switch calling or talking into
headset mode.

C. Answer by headset

Keep your microphone connected with the RJ9 headset jack, when there is an incoming call,

press [headset icon] and talk with the caller. If you want to hang up, please press [headset icon] again.

Pressing [speaker icon] can change calling or talking into speaker mode, and lifting the handset
switches to handset mode.

2.2. Make Calls

A. Use the handset
Pickup the handset, the LCD will show the current lines (user is able to switch from line1 to
line6 by pressing the line key beside the LCD). Press soft key "**Send**" to dial the number.
When you hear the tones of "du~~du~~" and the phone number your dialed is being
displayed on the LCD, the phone at the side of being called should be ringing. If the called
party answers this calling, the call is established and the calling timer is started immediately.

B. Use the speaker

Press [speaker icon] key, the LCD will show the current lines (user is able to switch from line1 to

line6 by pressing the line key beside the LCD). Input the phone number and press soft key
"**Send**" to dial the number. When caller hear the tones of "du~~du~~" and the phone number
your dialed is being displayed on the LCD, the phone at the side of being called should be
ringing. If the called party answers this calling, the call is established and the calling timer is
started immediately.

C. Use the headset

Press [icon] Key, the LCD will show the current lines (user is able to switch from line1 to line6 by pressing the line key beside the LCD). Input the phone number and press soft key "**Send**" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

D. Dial from phone book

1. Press [icon] key to enter the menu and choose "**Contact**" option. Press "**Enter**" soft key and then find the contact person by navigation keys. When the certain contact person is highlighted, press "**Dial**" or just pick up the handset to call this number.
2. Pick up the handset, press "**Contact**" soft key, then find the contact person and press "**Dial**" soft key.
3. Pick up the handset, press [icon] and enter "**Contact**", then find the contact person and press "**Dial**" soft key.

E. Dial from call history

1. Press [icon] key to enter the menu and choose "**History**" option, then select one of call history entry, and press "**Dial**" soft key or pickup the handset to call this number.

2. Pickup the handset, press "**History**" soft key, then select one of call history entry, and press "**Dial**" soft key to call this number.

3. Pickup the handset, press [icon] and enter "**Call History**" ,then select one of call history entry, and press "**Dial**" soft key to call this number.

2.3. Pre-dial

It's a method to dial a phone number immediacy at standby mode.

The method is as below：

A. Dial-up the phone number at standby mode

B. Press soft key "**Dial**" or Pick up the handset or Press 🔊 or 🎧 to send out the number.

2.4. Multiple line dial-up

A2X(W) supports up to 8 concurrent calls. If there is a new incoming call when you're talking on A2X(W),the new incoming call will be displayed on LCD and status indicator LED will be fast blinking. User can press soft key "Hold" then press "Answer" to receive the new incoming call.

2.5. Call Hold

The current calling will be hold by pressing soft key "**Hold**" or ☎ ,and the held call will be resumed after pressing soft key "**Resume**" or ☎ or the corresponding line key. Even on 5-way conference calling, the conference will be held after pressing "**Hold**" key, and be resumed to 5-way conference after pressing "**Hold**" Key again. Remember the conversation is still on hold without being ended even if hung up under the status of hold.

2.6. Call Transfer

1. Attended call transfer
The attended transfer allows user to call a third-party before transferring the calling.

While calling, press the "**Transfer**" soft key to hold the current call and dial the target number you want to transfer to on the activated line and press "**Send**" soft key to call that number. After the target party answers the call, press "**Transfer**" soft key again to complete the transfer.

If the target number has been setup in the current BLF list, and you have already finished the necessary setup on Webpage of A2X(W), there is an easier way to complete the attend transfer. While calling, press the corresponding BLF key of the target number and then press the "**Transfer**" soft key, the attend transfer will be achieved.

2. Blind call transfer

The blind transfer allows user to transfer a call without speaking to the third party. On the user side, the call will be ended as soon as the target phone number is dialed.

Operating steps: Press "More" soft key to get more option, then press "Bxfer" soft key, input the transfer target number and press "Send" soft key.

If the target number has been setup in the current BLF list, and you have already finished the necessary setup on Webpage of A2X(W), there is an easier way to complete the Blind transfer. While calling, press the corresponding BLF key of the target number, the blind transfer will be achieved.

2.7. Mute calls

The input audio will be not transmitted to peer phone after pressing ⊘ key, and the phone will be muted even switched among different modes of speaker, handset and headset.

To un-mute, just press ⊘ key again.

2.8. 5-Way Conference

1. While on calling, press the soft key "**Conf**", input the 3_{rd} party's phone number and then press the softkey "**Dial**" or press the soft key "**Conf**" and press the corresponding BLF key to invite the 3_{rd} party to join a conference call.
2. After the third party answers the call, pressing "**Conf**" key again to establish the 3-way conference.

1. New call

    1.1. While on the Conf call, the initiator can press the '**New call**' soft key to dial the call, then press the '**Conf**' soft key join the conf room;

    1.2. Or when there is a new call incoming, answered the call, and press the 'Conf' soft key, the more can add 5-ways in the conf room.

2. Mute

    2.1. While on the Conf call, the initiator can press the '**Mute**' soft key to forbidden the chosen conf member speak;

    2.2. After '**Mute'**, the initiator can press '**UnMute'** to recover the chosen ways speak.

3. **More**

    3.1. While on the Conf call, the initiator can press '**More**' soft key to switch the first two keys feature.

4. **Remove**

    4.1. While on the Conf call, the initiator can press the '**Remove**' soft key to remove the chosen conf member, the remove talking would be end the call.

    4.2. If all the conf member be removed, the conf call would be ended.

5. **Hold**

5.1. While on the Conf call, the initiator can press the '**Hold**' soft key to hold the current conf call, and press the '**Resume**' would recover the call.

6. **End**

6.1. While on the Conf call, the initiator press the 'End' key can end the conf call.

2.9. Hang up the phone

1. Softkey hang up
While on calling, press the softkey "**End Call**" to hang up.

2. Handset hang up
Put back the handset at handset mode, the current calling will be hung up.

3. Speaker hang up

Press (◀ഀ) key at speaker model, the current calling will be hung up.

4. Headset Hang up

Press (☎) key at headset model, the current calling will be hung up.

5. Hang up one line call
Press the hook to hang up the current calling when 2 calls happened simultaneously.

2.10. Voicemail

A2X(W) has a (✉) key for entering voicemail box and indicating new voicemail. Press

(✉) key to enter the menu to configure voicemail number if you have never configured it previously. Otherwise, the voicemail number will be called after pressing it.

3. Keypad and GUI

3.1. Keypad

	Calling via headset.
	WiFi Signal indicator
	Call Forward is activated.
✉	New Voicemail.
	Auto-Answer is activated.
	DND is activated

3.4. Configuration

Press the key ⬚ to enter the Main Menu：

A20W, A20WAC:
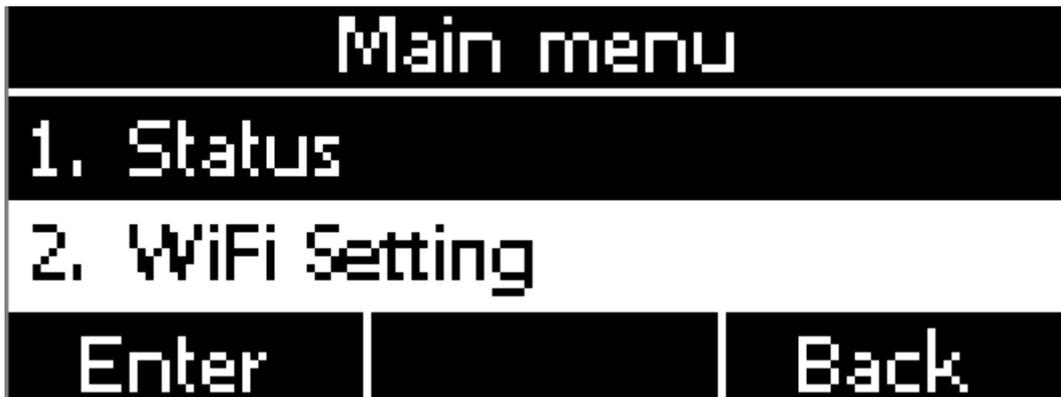

Move the navigation key and press the softkey "**Enter**" or input the corresponding Number key Select the item of Main Menu：

Number Key "**1**"	Enter "Status"
Number Key "**2**"	Enter "WiFi Setting"
Number Key "**3**"	Enter "Feature"
Number Key "**4**"	Enter "Directory"
Number Key "**5**"	Enter "History"
Number Key "**6**"	Enter "Message"
Number Key "**7**"	Enter "Settings"
Number Key "**8**"	Enter "Display"

A20, A21 and A26:
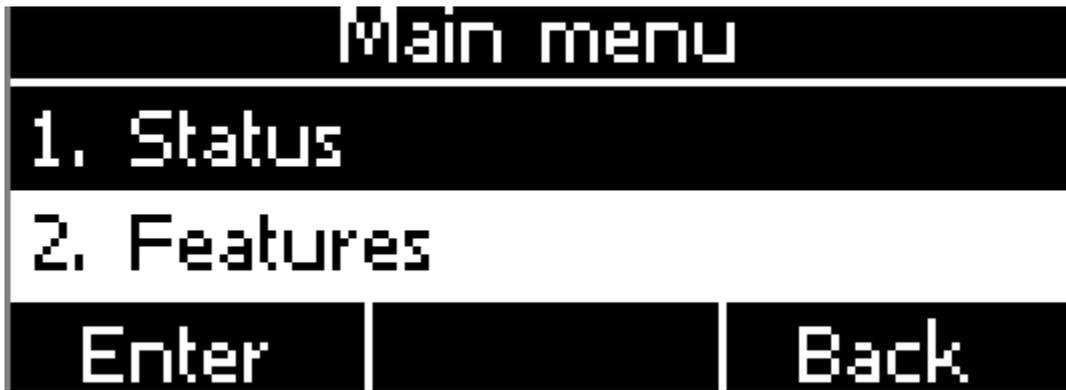

Move the navigation key and press the softkey "**Enter**" or input the corresponding Number key
Select the item of Main Menu：

Number Key "**1**"	Enter "Status"
Number Key "**2**"	Enter "Feature"
Number Key "**3**"	Enter "Directory"
Number Key "**4**"	Enter "History"
Number Key "**5**"	Enter "Message"
Number Key "**6**"	Enter "Settings"
Number Key "**7**"	Enter "Display"

3.4.1. Status info

It's able to check the status info via LCD Display or Web.

And the basic status and details status will be optional displayed on LCD display

1. Basic Status——IP address.MAC address. Firmware version。

2. Details Status——Network info. Production info and Account info in details.

Basic Status

You're able to check the basic status in both ways as below：

1. **Press the key** ✓ **on standby**.

2. **Press the key** ☰ **and select the "Status" of Main Menu**.

3. **Move the navigation key, the status display the Model, IP, MAC, Firmware, More**

Details Status

Select "**More**" and then press the softkey "**Enter**" to check details info, and move the navigation key to check more.
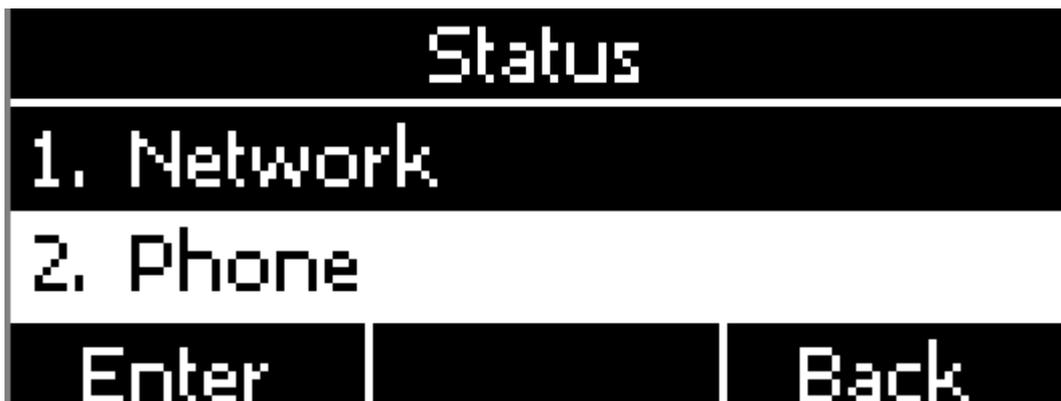

Press the softkey "**Enter**" to check status info, and "**Back**" to return the Basis Status page.

Check the Status info via Web

1. Check the IP address of IP phone;

2. Type the IP address on a web browser；

3. Input the username and password, the default user and password for Administrator is (admin, admin), for general user is (user, user), and then press "**Enter**".

4. By default, the Status info will be displayed.

3.4.2. Call Features

In this part, we will introduce the following content:

- Call Forward

- Call Waiting

- Auto Answer

- DSS Keys

- Key as send

- Hotline

- Anonymous Calls

1. Call Forward

"Call Forward" includes"Always Forward", "Busy Forward", "No Answer Forward".

"Always Forward" has the highest priority, and "Busy Forward" has the same priority as "No Answer Forward", that means once the function of "Always Forward" is activated, other call forward features will be unavailable.

Any type of Call forward feature is activated, the Icon will be indicated on the LCD Display.

Always Forward

All incoming calls will be forwarded to target phone number once the "**Always Forward**" activated, setup this feature as follow and please move the navigation to check more：

| Item	Operation	Description
Always	Press the key ◀.▶ or the soft key "**Switch**"to setup	Switch on or Switch off the feature. "**Enable**" mean this feature is enabled，"**Disable**" mean this feature is disabled.
Forward to	The Number key, "*"key, and "#"are permitted to be input.	Setup the target phone number which all incoming calls transferred to
On Code	The Number key, "*" key, and "#"are permitted to be input.	The feature code to enable all incoming calls forward, the phone will send the feature code directly to open all incoming calls forward
Off Code	The Number key, "*" key, and "#"are permitted to be input.	The feature code to disable all incoming calls forward, the phone will send the feature code to close all incoming calls forward directly

Busy Forward

It means the phone is busy once the phone is not at standby mode. Setup this feature as below:

Item	Operation	Description
Busy	Press the key ◀ . ▶ or softkey"**Switch**"to setup	Switch on or Switch off the feature. "**Enable**" mean this feature is enabled, "**Disable**" mean this feature is disabled.
Forward to	The Number key, "*" key, and "#" are permitted to be input.	Setup the target phone number which all incoming calls transferred to
On Code	The Number key, "*" key, and "#" are permitted to be input.	The feature code to enable busy calls forward, the phone will send the feature code directly to open busy call forward
Off Code	The Number key, "*" key, and "#" are permitted to be input.	The feature code to disable busy calls forward, the phone will send the feature code directly to close busy call forward

No Answer Forward

All incoming calls will be forwarded after time out, once the feature of "No Answer Forward" is activated. Setup this feature as below, and please move the navigation key to check more:

Item	Operation	Description
No Answer	Press the key ◀.▶ or softkey "**Switch**"to setup	Switch on or Switch off the feature. "**On**" mean this feature is activated，"**Off**" mean this feature is unactivated .
Forward to	The Number key, "*" key, and "#" are permitted to be input.	Setup the target phone number which all incoming calls transferred to
After Ring Time	Press the key ◀.▶ or softkey "**Switch**" to setup	Setup timer for no answer status. All incoming calls will be forwarded after time out once Call forward when no answer activated.
On Code	The Number key, "*" key, and "#" are permitted to be input.	The feature code to enable no answer call forward, the phone will send the feature code directly to open all incoming calls forward
Off Code	The Number key, "*" key, and "#" are permitted to be input.	The feature code to disable all incoming calls forward, the phone will send the feature code directly to close all incoming calls forward

Setup Call Forward Via Web

Set Call Forward via web: **Phone→Features→Forward.**
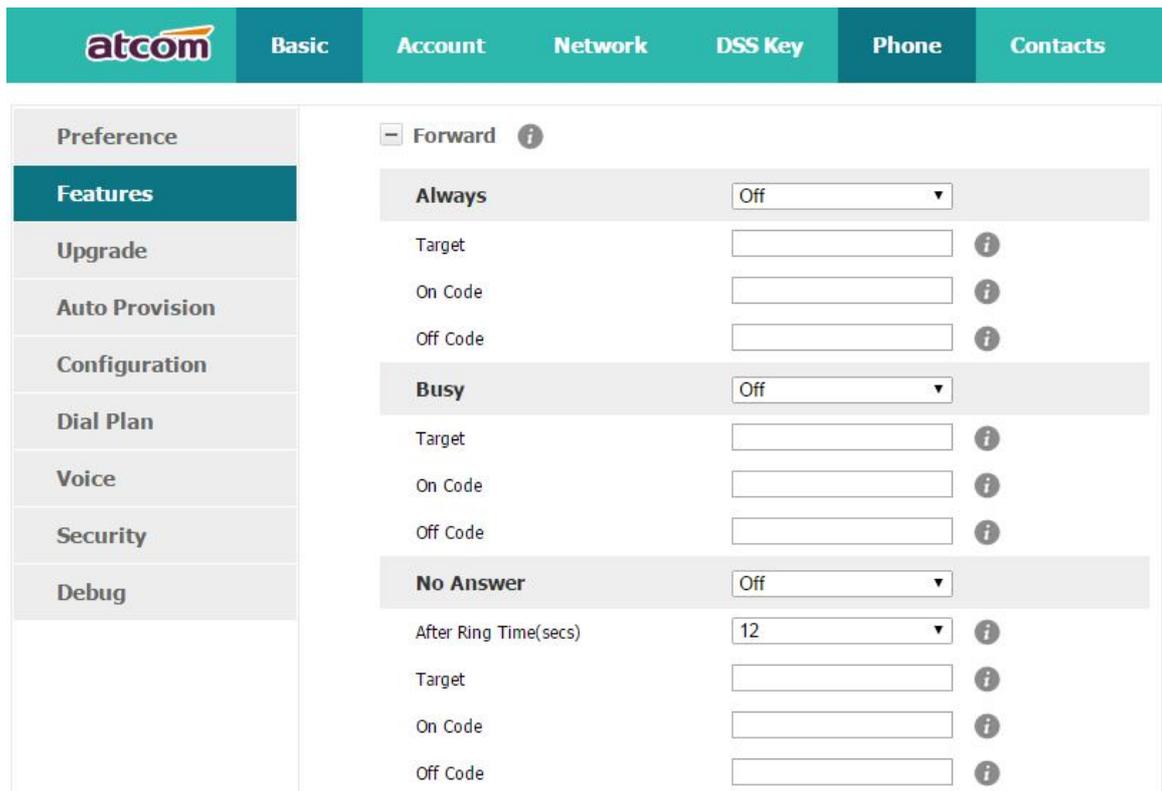

2. Call Waiting

The feature of "Call Waiting" is available by default. If switch off this feature, whatever multiple SIP accounts had been registered successfully, only one single active calling is permitted (for example Dialing, Ringing, Calling, Holding).
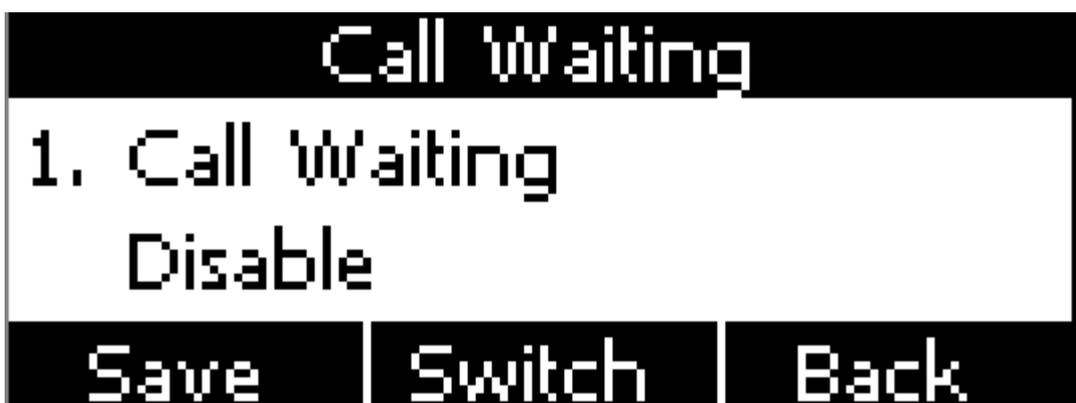

Item	Operation	Description
Call Waiting	Press the key ◄ ► or	Switch on or Switch off the feature.

	softkey "**Switch**" to setup	"**Enable**" mean this feature is enabled，"**Disable**" mean this feature is disabled.
Call Waiting Tone	Press the key (◀).(▶) or softkey "**Switch**" to setup	Switch on or Switch off the prompt playing. "**Enable**" mean this feature is enabled，"**Disable**" mean this feature is disabled .

Setup call waiting via web:**"Phone"→ "Feature"→ "General information"→ "Call Waiting".**

Setup call waiting Tone via web: **"Phone"→ "Feature"→ "Audio Settings"→ "Call Waiting Tone".**

3. Auto Answer

The feature of "Auto Answer" is switched off by default. All incoming calls will be answered automatically when the phone is standby once "Auto Answer" is activated. "Auto Answer" when the phone is under "on Calling" status.

Please move the navigation key to check more:
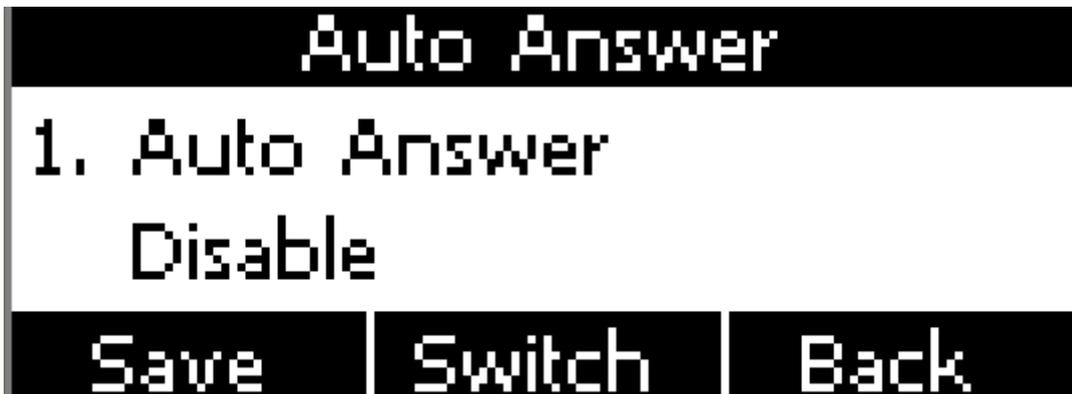

The Icon 🔲 will be indicated once "Auto Answer" is available。

Setup "Auto Answer" via Web："**Phone"→ "Feature"→ "General information"→ "Auto Answer**"

4. DSS Keys

The programmable keys include Line keys, Programmable keys and Soft keys on Standby UI.

it is able to modify the feature of each programmable key.

All programmable keys has been classified as "N/A", "Line Key", "BLF", "Key event", "Speed dial", "Intercom"

And the "Key Event" has been classified as "Conference", "Hold" "DND", "Redial", "Call return", "Pickup", "Call Park", "DTMF", "Directory".

Comments：

N/A

N/A means this key is not permitted to be set as a programmable key.

Line key

Display the account information, press it for making a call, answering incoming calls, call hold and resume.

Item	Description

Network	2014/10/10 11:14	File folder	
Phone	2014/10/10 11:14	File folder	
Setting	2014/10/10 11:14	File folder	
voip	2014/10/10 11:14	File folder	

4.4.2.   Import configuration file

Click the button "Choose file" to select the target file for importing, and then click the button "Import". The phone will be rebooted a couple of minutes later, and import successfully.

Note：If some part of the configuration file has been modified manually, it must be re-compressed as the format of "tar.gz" in Linux

4.5. Export System log

When the phone doesn't working well, System log is the best assistant tools for troubleshooting, all operation details has been recorded. This operation is available via Web only.

Export System Log

Log Location   ○ Local ● Server ⓘ

Server Name   [_____]

Log Level   [Info ▼]

[Export]

Item	Description
Log Location	You can import the system log to local PC or remote Server.
Server Name	User must fill the address of server if you choose to export the system log to remote server.
Log Level	It defines the detail of system log as 5 different levels, Fatal, Error, Warning, Info, and Debug. The Debug level is the most detailed.

4.6. Dial plan

The customized Dial Plan are available , for example , the rule of replacement, Instant Calling, Area code, Restriction of Outbound.

Before customizing the dial plan, user must learn the basic grammar as below,

.	Represent a character or multiple ones，e.g., "6." can match "66","678","6plus" and so on
x	Represent one character, e.g., "6x" can match "61","62", " 6s" and so on
[]	Represent a character in one range, e.g., " 83[0-5]18618"can matche"83018618","83488618" and so on
()	Represent the combination of characters, e.g., "([1-9])([2-7])3" can match "923","153","773" and so on
$	Add a number after the character "$" to define the location of the characters, e.g., use the prefix " 8([1-3])(.)" to replace "7$2", the phone will call "7837" after dialing out "82837"

Note：Any operations (add, modify or delete) on the current dial plan will be not effective until click "Save".

4.6.1. Replace Rule

Dial plan "Replace Rule" means to replace a batch of complicated character string by some simple characters, to make a speed dial.

Item	Description	Sample
Number	The string works as replacer, not null	Set Number as "6",
Replace	The string that to be replaced, not null	Set Replace as "6032",
Account	The account to apply this dial plan, blank or 1 is valid.	Set Account as "1". It means when dial 6, the phone will dial 6032.
Add	Multiply replace rules can be configured in one phone, after one replace dial plan configured, click this button to add a new one	
Edit	The existed replace dial plans are editable. The specified dial plan should be selected until it is covered with orange and the input fields "Number" and "Replace" shows the details correctly. After modifying, click button "Edit" to make it to be effect	
Delete	Delete one added or saved replace dial plan or multiple ones, click the frame after the specified replace dial plan before delete it, and then click button "Delete"	

Save	Any alteration won't take effect until the button "Save" is clicked.	

4.6.2. Dial-now

Dial plan "Dial-now" permits the corresponding phone to be dialed instantly without pressing the soft key "Dial", once the input has been matched. It works like a hotline.

Item	Description	Sample
Dial-now Rule	The string to be dialed out automatically by the phone	Set "Dial-now Rule" as 6xxx, keep "Account" as null
Account	The account to apply this dial plan, blank or 1 is valid.	It means the phone will use the 1st available account to call 6033 after "Dial-now Time-out" seconds when inputting four figures begin with 6
Add	Multiply dial-now rules can be configured in one phone, after one dial-now dial plan configured, click this button to add a new one	
Edit	The existed dial-now dial plans are editable. The specified dial plan should be selected until it is covered with orange and the input fields "Number" and "Dial-now" shows the details correctly. After modifying, click button "Edit" to make it to be effect	Note：Dial-now rule is different with hotline. The Dial-now rule will take effect when input

Delete	Delete one added or saved dial-now dial plan or multiple ones, click the frame after the specified dial-now dial plan before delete it, and then click button "Delete"	numbersmatches the dial plan, and hotline takes effect in situation that the phone is in dialing state
Save	Any alteration won't take effect until the button "Save" is clicked.	

Set "Dial-now Time-out" via web: **Phone→Features→General Information→Dial-now Time-out (secs).**

4.6.3. Area Code

Dial plan "Area Code" has been defined to identify each different area. To call a phone number of other areas, user must add the area code to be in front of the phone number. For convenience, area code has been recommended to be configured while frequently dialing to that type of phone number.

Item	Description	Sample
Code	The area code dialed before the number	Set "Code" as "0086577", Set "Minimum length" as "5".
Minimum length	The minimum length of the number input to active the area code dial plan	
Maximum length	The maximum length of the number input to active the area code dial plan	It means when dialing 83018618 with the 5_{th} account, the phone will dial 0086577 before it.
Account	The account to apply this dial plan, blank or 1 is valid.	Note：If the length of the

Confirm	Apply this dial plan	number input in the dial UI is not between minimum length and the maximum length, area code will not take effect
Cancel	Recover all input fields to the state that saved at latest time	

4.6.4. Block Out

Dial plan "Block out" is used to prohibit the phone number outgoing call from some accounts.

| Item	Description	Sample
Block Out Number	The number that prohibited	Set "Block Out Number 1"as"10086" It means the phone will enter the "Call End" UI when dial "10086"
Account	The account to apply this dial plan, blank or 1	
Confirm	Apply this dial plan	
Cancel	Recover all input fields to the state that saved at latest time	

5. WI-FI(For A20W and A20WAC)

5.1. Configure the WIFI on the phone

1. Press "**Menu**"→"**WIFI Settings**"→**"Switch",** open the WIFI connection mode.

2. Please move the navigation key to check the WIFI you want to connect, Press "**Connect**", then input the correct WiFi password.

3. Return to the standby interface, and phone successful connected to the wifi.

4. The last option is Manual setting, press 'Enter', then input the SSID and password.

5.2. Configure the WIFI on the WEB

A20W and A20WAC connect to network via Wi-Fi acquiescently, click "**Search Wi-Fi**" button to search the available Wi-Fi.

After all available Wi-Fi hotspots are list out, click the round behind the available Wi-Fi which you want to connect.

Input the right "**Secret Key**" and then click the "**Confirm**" button, the phone will reboot, after rebooting,the Wi-Fi icon will display on the home screen, it means connect failed when the icon come with 📶, then you should check the configuration.if the icon come with 📶,it means connect successfully.

5.3. Enterprise WiFi

It supports WPA/WPA2 Enterprise wifi , it is based on Radius sever and configuration the Enterprise wifi in the router.

Configure the Enterprise wifi:

1. Upload the Certificates

   Via the webpage: "**Phone**"→"**Trusted Certificates**"

2. Input the WIFI account info

Via the webpage："**Phone**"→"**Network**"→ "**WIFI**"

Press the "Search WIFI", and select the SSID, then input the radius ID and password.

Via the phone:

Press "**Menu**"→"**WIFI Settings**", and select the SSID , then input the radius ID and password.

6. LTE Network (For A20LTE)

6.1. Configure the LTE on the phone

1. Press **Menu → LTE Setting**, enable LTE feature

2. After enable LTE, press ↓ key, you can see **Network service, Network type, Signal strength and IMSI**.

6.2. Configure the account on the LTE network

Under LTE network, you can set the phone accounts through auto provision or phone LCD.

Auto provision configuration account:

```
#!version:1.0.0.1
###############################################################
##                    Account1 Basic Settings              ##
###############################################################
account.1.display_name =
account.1.auth_name =
account.1.user_name =
account.1.password =
account.1.sip_server.1.address =
account.1.sip_server.1.port =
```

LCD menu configuration account.

Press **Menu→ Settings→ Advanced settings** (default password: admin)→ **Accounts**, input the account info.

7. FAQ

7.1. How to reset to factory

There are 3 methods for factory reset：

1. Factory reset via phone：

   a) Press the key

   b) Select "Settings", then press the soft key "Enter"

   c) Select "Advanced Settings"，then press the soft key"Enter"

   d) Input the access password, then press the soft key"Enter"

   e) Select "Reset to factory"，then press the soft key"Enter"

   f) Press the soft key"OK"，then the phone will be reboot and resumed to factory default settings

2. Factory reset via Web:

   a) Key in the IP address of phone with a browser,

   b) Access the webpage of phone as the role of "admin", username/password is admin/admin.

   c) Select"Phone"

   d) Select"Upgrade"

   e) Click the button "Reset to Factory"

   f) Click the button "OK"

3. Factory reset during starting:

   a) Hold the key "*" and "#" while power on for 5 seconds

   b) The phone will be reboot and resumed to factory default setting

7.2. Upgrade the firmware on safe mode

If the phone can't be started successfully, user is able to upgrade the firmware on post mode,

a) Setup a TFTP Server and set the PC's IP address as "192.168.1.200"

b) Copy the kernel file we supplied to the root menu of TFTP Server

c) Ensure the TFTP Server and phone are connected to the same network switch and both reachable

d) Long Press the key "*" and "1" to upgrade the kernel file, and then plug in power until upgrading information displayed on LCD

e) The phone will start downloading file from TFTP server

f) After downloading completed, the phone will be automatically upgraded

g) After upgrading completed, the phone will be started with the factory default settings

7.3. How to make IP Peer to Peer call

1. Press it in dialing status

2. To make a IP peer to peer call

   Using press"*"to choose "." that in the IP address. For example, to dial "192.168.1.100", just need input "192","*","168", "*","1", "*","100".

3. Disable the IP call feature

   Via webpage modify the make IP call feature:

   Phone→Feature →Accept SIP Trust Server Only, press "**Enable**".

8. Troubleshooting

8.1. The phone is failed to register to SIP server

1. First of all, check the IP address. If the LAN port is DHCP, please ensure the DHCP server has been enabled.

2. Check the network gateway

3. Check the DNS

4. Make sure the input account matched the one provided by Service Provider

5. Make sure SIP Server has been enabled already

6. Make sure the Port of SIP Server, it's 5060 by default

1. Try to make a IP peer to peer call, to make sure the mic and speaker are working fine

2. Enable STUN via Web

3. Set the address of STUN Server, for example stun.sipgate.com

4. Present this operation above and the phone will be reboot

5. Try to make a normal call again

9. Abbreviation

DND：Do Not Disturb

CFWD：Call Forward

Bxfer：Blind Transfer

Conf：Conference

Num：Number

SIP：Session Initiate Protocol

RTP：Real-time Transport Protocol

SDP：Session Description Protocol

VPN：Virtual Private Network

VLAN：Virtual Local Area Network

QoS：Quality of Service

Syslog：System log

UDP：User Data Protocol

TCP：Transmission Control Protocol

TLS：Transport Layer Security Protocol

BLF：Busy Lamp Field

DNS：Domain Name System

SRTP：Secure Real-time Transport Protocol

NTP：Network Time Protocol

VAD：Voice Activity Detection

CNG：Comfort Noise Generator

10. FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The devices complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) The device may not cause harmful interference, (2) the device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, Pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment dose cause harmful interference to radio or reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
